SKILLS

Languages: Java, JavaScript, Python

Tools/Platforms: React.js, HTML, CSS, Node.js, MongoDB, MySQL, GitHub, Postman, Eclipse, Katalon, Jenkins

Soft Skills: Problem-Solving, Teamwork, Project Management, Communication, Leadership

TRAINING

Code Alpha

Full-Stack Development

Feb'25–Mar' 25

- Developed and deployed 4+ **frontend** modules using **HTML, CSS, and JavaScript**.
- Built and optimized 5+ **RESTful APIs** using **Node.js, Django, and Flask**, reduced response time by ~30%.
- Integrated **MongoDB** and **MySQL** databases with 99% uptime during testing.
- Applied **JWT** and **OAuth2** authentication on multiple endpoints, ensured secure access control.

Cipher Schools(EdTech Company)

Full-Stack Development using MERN Stack

Jun'24–Jul' 24

- Created 3 full-stack web applications with complete **CRUD** functionality and user authentication.
- Utilized **React.js** and **Hooks** to build responsive UIs, increased user engagement by 40% in testing.
- Designed role-based access control using **JWT & bcrypt** across all modules.
- Deployed apps on **Vercel** with CI/CD practices, achieving 100% deployment success rate.

PROJECTS

PNR Enquiry Api-Testing| Java, Rest Assured, Mock API

Apr'25

- Designed a **RESTful mock API** simulating Indian Railways PNR enquiry system with path parameter support for pnrNumber and nested passenger details.
- Implemented automated API test cases using **Rest Assured in Java** to validate status codes, response times (<500ms), and content-type headers (application/Json).
- Conducted gamified testing by recording and uploading execution steps on YouTube, demonstrating real-time testing skills and showcasing end-to-end validation workflow.

Note.me – Full Stack Note-Taking App|MERN Stack, REST APIs, JWT Authentication

Jul'24

- Designed a full-stack note-taking application with 100% CRUD functionality, built using **MongoDB, Express.js, React.js, and Node.js**.
- Implemented **JWT-based** user authentication and role-based access control, secured access for over 50+ testusers during development.
- Connected frontend and backend via **Axios & Fetch API**, ensured real-time sync and reducing API response lag by ~25%.
- Optimized MongoDB queries with **Mongoose ORM**, improving database efficiency for frequent note retrieval by **40%**.

Weather Web Application| React, Open Weather API, CSS

Apr'24

- Built a responsive weather application that provides real-time weather updates for over 50+ global locations using the **Open Weather API**.
- Implemented automatic geolocation detection to instantly fetch and display weather data based on the user's current location with 95% accuracy.
- Enabled users to switch between **Celsius** and **Fahrenheit**, improving user customization experience by 60%.
